- Linux

About me

I am dedicated and results-oriented professional with a passion for problem-solving and a strong background in technology. Adept at leveraging innovative solutions to address complex challenges and enhance operational efficiency. I am eager to contribute technical expertise and analytical skills to a dynamic team or project.

Achievements & Key Projects

Projects:

AI Congo Agent (The Game of Congo)

For my final year project, we were given a task of developing an AI agent that plays a board game known as Congo (Variant of Chess with elements of chess).

Wits Overflow

In this project we were given a task to develop a public platform building the definitive collection of questions & answers. The purpose of the app was to help wits students find and contribute answers to technical challenges.
